

Everglades Aquatic Nurseries, Inc.

P. O. BOX 587

TAMPA, FLORIDA

BUSINESS TERMS

1. Shipments Go Forward Charges Collect.
2. Money Order Or Check Must Accompany All Orders.
3. 50% Deposit On C.O.D. Shipments.
4. Print Your Name, Address And Telephone Number so no mistake will be made in addressing your shipment.
5. Fish Orders MUST EXCEED \$7.50
6. Plant Orders MUST EXCEED \$2.50 Unless Accompanied By A Fish Order.

AIR SHIPPING

This is the most satisfactory way to ship Tropical Fish if the distance is great. It is also the best way to ship Aquarium Plants and Water Snails. When shipping by Air, either Air Freight (which is cheaper on a large shipment) or Air Express may be used.

Air Freight must be picked up at the airport but Air Express is delivered to your door.

RAIL EXPRESS

Due to curtailed service, Rail Express is slow. However, it can be safely used in Shipping Tropical Fish, Aquarium Plants and Snails on short distances. For greater distances, use AIR - not rail.

PARCEL POST

We can now ship Plants, Snails and Water Newts and Hyla Tree Frogs via Parcel Post Special Delivery. This is an inexpensive way of shipping and the service is usually good. If you wish shipment sent via PARCEL POST SPECIAL DELIVERY include Parcel Post Charges when remitting for your order.

If the distance is great, (requiring more than 4 or 5 days to reach you) we recommend AIR PARCEL POST as a shipment too long enroute is likely to spoil.

SHIPPING CONTAINERS

All fish shipments go forward in plastic bags which are safe, inexpensive and light weight (which is a saving on freight charges) and one unit will accommodate 200 fish the size of Guppies or 100 to 125 fish the size of Moons and Swordtails. A unit consists of 1 plastic, and 2 cartons, and if the weather is cold a jiffy liner is used. The cost is as follows:

- | | | |
|---|--|-------------|
| 1 | Single Unit 1 Plastic (1 plastic, 2 cartons) | \$1.25 Each |
| 1 | Double Unit 2 Plastics (sometimes necessary to separate) | 1.75 " |
| | Wax Cartons for Male Fighting Fish .03¢ Ea. (fishes | |

PLASTICS AND CARTONS ARE NOT RETURNABLE

LOSSES

In case of losses due to delay or bad handling, a bad order report should be secured from the carrier and claim filed with them. You can depend on our doing everything in our power to help you on such claims.

Aust. "4 Leaf" Clover

ALL FISH SHIPMENTS GO FORWARD IN PLASTIC UNITS

1. Have clean aquariums ready with seasoned water for the new fish on arrival.
2. Strain some water from shipping container and add to water in waiting aquariums. Do not use the water in the shipping container if it is soured!
3. Do not put your new arrivals with your other Tropicals for at least 2 or 3 days.
4. Put fish in jars with their own water and float in your aquariums until the temperature in the jars equalizes with that in the aquarium, then release them.
5. It is always good to add a teaspoonful of salt and teaspoonful of epsom salts to every 5 gallons of fresh raw water in any newly set up aquarium. This helps season the tap water and acts as a tonic for the new fish. Dissolve these salts in a separate container before adding to your aquarium water. It will not harm Plants or Snails
6. For further instructions, secure books on the subject from your local library or write us for one of the following books.

"Exotic Aquarium Fishes"	By: Wm. T. Innes	\$9.75 Each
"Tropical Fish"	By Lucile Q. Mann	1.00 "

HOW TO HANDLE AQUARIUM PLANTS ON ARRIVAL

In planting an aquarium, tall plants are usually placed in the background with the shorter plants in front. Vallisnerias as well as some types of Sagittarias are good background plants. We offer many decorative plants to be used as center plants. The type used depends on the size of the aquarium and the personal desires of the individual.

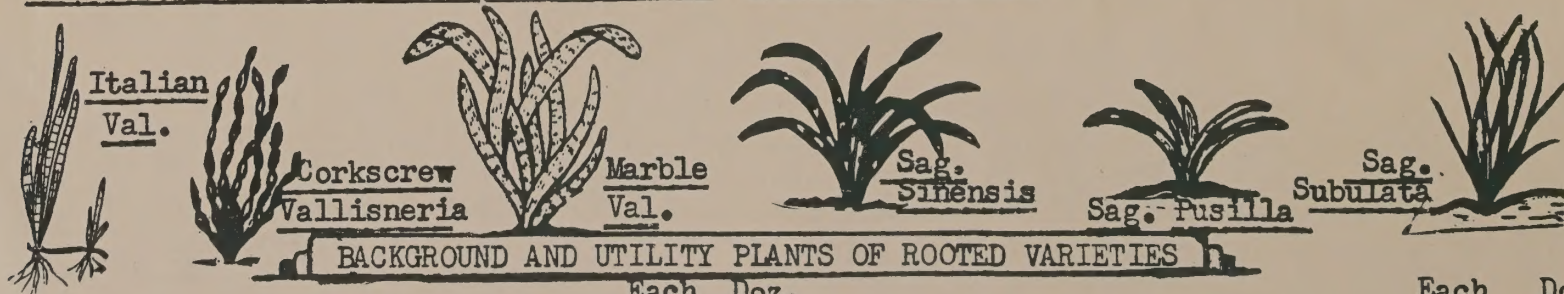

LIGHT One of the greatest causes of Plant spoilage is crowding and LACK OF LIGHT. With few exceptions, Aquarium Plants require from 5 to 6 hours of sunlight per day or that equivalent in strong electric light directly over the aquarium. When using fluorescent lights, be sure to secure the tube marked "warm" and not "cold". Plants will not grow if lighted by a "cold" fluorescent tube. Without proper light, plants eventually spoil.

Good light is also necessary for most fishes and many varieties often get "rickets" because aquariums do not have sufficient light.

PLANT COLLECTIONS

(These Plants are selected in proper quantities to balance specified aquariums)

"Aqua-Scaping & Oxygenating" Plant Collection #1 ***** \$2.50

This collection contains plants for a 10 to 15 gallon aquarium. It includes such plants as Vallisneria, Sagittaria, Spatterdock, Ludwigia, Banana Plants, etc.

"Aqua-Scaping & Oxygenating" Plant Collection #2 ***** \$3.00

This collection contains enough plants to balance a 15 to 20 gallon aquarium. In addition to the items contained in Collection #1, "4 Leaf" Clover, Water Roses, etc. are also included.

"Aqua-Scaping & Oxygenating" Plant Collection #3 ***** \$3.50

Contains Cellophane Plant, "4 Leaf Clover", Marbled Vallisneria, Spatterdock, Sagittarias, Vallisnerias, etc. in quantities to balance a 20 to 25 Gallon aquarium.

(There are times when some plants in these collections are not available. When this happens, other Plants of equal value are substituted.)

ALL COLLECTIONS ARE SHIPPED CHARGES COLLECT! If you wish shipment sent via Parcel Post please include cost of postage in your remittance.

Prices on larger collections quoted on request.
